Lee Young-jun

Senior iOS Developer

kofggm@gmail.com github.com/2sem www.linkedin.com/in/gamehelper/

SK AX(C&C) 2024.06 – 2025.10 Freelancer iOS Developer

Shipped AI recommendations, resolved critical crashes, mentored junior engineers.

AI Layer iOS SDK

2025.01 – 2025.10 · SDK · Swift

Accessibility & UI improvements, MR template setup

Swift | GitLab | Slack

T world iOS

2024.10 – 2025.10 · Mobile · Swift

5,000+ weekly crashes eliminated

Swift | Firebase | SPM | WKWebview | Ollama | Widget

Medium: Automating MR Review on GitLab Using AI (Ollama)

SWING iOS

2024.06 – 2025.10 · Mobile · Swift

Junior coached to 80% ownership

Swift | Objective-C | Cordova | Firebase | SPM | GitLab

Medium: Running Xcode 14 on Sonoma Medium: Run Xcode 15.4 on Ventura

---

KICKGOING 2021.06 – 2023.10 App Developer → Mobile Tech Lead

Led RN migration and BLE hardware. Founded monthly dev conference. Contributed to open-source.

CI/CD & Test Automation

2021.07 – 2021.09 · CI/CD · React Native

CI/CD pipeline — config injection eliminated wrong-env deploys

Fastlane | GitHub Actions | Jest | Husky | Gradle | TypeScript | YAML

Medium: Android QA App Split Medium: RN Deploy All-in-One

Turn-by-Turn Navigation

2021.12 – 2022.04 · Mobile · TypeScript

Daum minified JS analyzed to extract real coordinate transform

TypeScript | React Native | Naver Map | Daum Route API

YouTube Demo

Data Usage Optimization

2022.05 – 2022.06 · Mobile · TypeScript

API data usage significantly reduced

TypeScript | React Native | AsyncStorage | Google Polyline | Flipper

YouTube: Background Exit Demo

Multilingual Support

2023.06 – 2023.08 · Mobile · TypeScript

Open-source PR merged

TypeScript | React Native | react-native-android-open-settings | i18n | Open Source

Medium: Multi-Language in React Native Medium: Android Per-App Language Settings YouTube Demo

SIWONSCHOOL(SJWInternational) 2018.06 — 2021.05 iOS Developer

Built shared CocoaPods video player library, established CI/CD, pushed App Store rating to 4.7.

SiwonSchool

2018.06 – 2021.05 · Mobile · Swift

App Store rating reached 4.7

Swift | RxSwift | MVVM | CocoaPods | DRM | AVFoundation | XCUITest

---

VicTOEIC Vocabulary

2019.01 – 2021.05 · Mobile · Swift

First iOS version — drove from spec conflict to App Store with in-app purchase

Swift | AVFoundation | StoreKit | CocoaPods | CDN

SiwonSchool Pen

2019.11 – 2021.05 · Mobile · React Native

RN lecture player shipped + FlatList perf fix + Appium regression coverage

React Native | Firebase | Appium

English Adventure

2020.04 – 2020.05 · Mobile · Unity

Unity prototype shipped solo in 2 months

Unity | C# | Unity Audio

Side Projects 2019 — Personal

Jikding

2024.01 – 2024.02 · Mobile · React Native

Work-life balance app — holiday API, Realm, countdown with UX designer

TypeScript | React Native | Realm | Public API

GitHub

Symlink Maker

2020.10 – 2020.11 · macOS · Swift

Solved ln -s confusion — right-click symlink creation via Finder extension

Swift | Finder Extension | macOS

Lost Ark Helper

2019.01 – 2019.02 · Mobile · Swift

Item-level simulator — site crawled solo, serverless with Xlsx + Core Data

Swift | Core Data | Xlsx

Solo iOS Developer 2017 — 2018 Plan · Design · Development

Committed a full year to learning iOS from scratch — no team, no spec, no shortcuts. Shipped real apps to validate the work.

ShowNote (Maintenance)

2017.02 – 2018.07 · Mobile · Swift

~~₩1B~~ investment secured
